2006	3000	3000	3000	18,000	18,000	24,000	36,000	36,000	36,000	24,000	3,000	3000	
2007	3000	3000	3000	18,000	18,000	24,000	36,000	36,000	36,000	24,000	3,000	3000	

estimated

E. **Purpose of Use** - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation acres; Stockwatering Summer months; Domestic House + yard;
Other (specify) a few horses

Parcel Number(s) of Place of Use: 008-470-400-0

F. **Changes in Method of Diversion** - Describe any changes in your project since your previous statement was filed.

(New pump, enlarged diversion dam, location of diversion, etc.)

Larger holding tank 1300 gallons (used to be 500)

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

- a. Are you now employing water conservation efforts? YES ☒ NO ☐
Describe any water conservation efforts you have initiated: yard water for garden + flowers on drip system, water at night, low flush toilets, all overflow of tank returned to overflow of spring water course.
- b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved: No claim

Reduction in Diversions:

Year (AF/MG) Year (AF/MG) Year (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO X.
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES _____ NO _____

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES _____ NO X.
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:
- Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)
- I have data to support the above surface water use reductions due to the use of groundwater. YES _____ NO _____

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM CONTINUATION If there is insufficient space for your answers, please use the space provided below or add an attachment sheet.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

S10058

To Whom it May Concern:

In our last correspondence, your office recommended filing a complaint if there are any illegal water users known to me in the vicinity of my spring.

To the best of my knowledge, Carol Sherman's forest service use permit has been terminated and thus her use of the water has ended. A neighbor, Don Morgan, now uses the water and has neither water rights nor use permit.

I wish to make a formal complaint now because I wish to maintain my riparian right to the water and its use without interference.

I have telephoned the forest service repeatedly in an effort to resolve this matter. Mark Chaney (and Jo Ellen Kyle), Oak Knoll Ranger Station, (916-465-2241) have told me that before any decisions for new users were made they would have to be acceptable to current users. The issue is unresolved at this time, the neighbor continues to use the water without permission or rights, and the forest service is allowing the neighbor to make a proposal for consideration.

I hope your office can help me verify and maintain my prior and riparian rights. I do not wish new appropriative rights to be issued.

Sincerely, ⁰¹Reggy Goshgarian

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

To Whom it May Concern:

I am writing to you with regard to my statement of water diversion and use, number 10058. We recently had a major forest fire here which brought to my attention my water system, much of which had to be replaced. I have several concerns:

① Is my statement current? Originally filed in May 1980 and a supplemental statement filed in December of 1982 (for a July 1983 deadline) are the papers I have on record. Are these sufficient?

② Have there been any other claims either of water appropriation or of water diversion filed with your office in or around the area of my water?

I would appreciate your attention to these concerns and look forward to your reply.

Sincerely, Peggy Gushgarian

Ms. Peggy Goshgarian
Box 552
Seiad Valley, CA 96086

Dear Ms. Peggy Goshgarian:

STATEMENT 10058-SISKIYOU COUNTY

Thank you for your October 31, 1987 letter.

We have reviewed your statement file and it appears that your reporting of the Supplemental Statement is in good standing. Your next reporting period will be for years of 1986-1987-1988 and the form will be sent in January 1989.

In your letter you inquired if any claim of water has been filed in the vicinity of your diversion. A statement has been filed by Louis D. Jobe in May 1981 and an appropriative right has been in existence since 1939. The current owners are Stephen Sherman and Carol Sherman.

We hope the information furnished is sufficient and if have any other questions, please call me at the above telephone number.

Sincerely,

Koso Nodohara
Sanitary Engineering Associate
